### SUMMARY:

- Around **Five years** of Quality Assurance experience as **QA Engineering** in different domain & industry
- Hands on experience in various software development methodologies like **Agile** and **Waterfall** model
- Experienced in managing defect life cycle using **HP Quality Center/ALM**.
- Experienced in functional testing, reviewing and analyzing business requirements and writing detailed **Test Plans, Test Cases** and **RTM** (Requirement Traceability Matrix)
- Experienced in Verifying, Validating and performing Functional, Performance, System, Integration Scalability, User Interface and Regression testing of Application Software
- Experienced in managing agile project by creating story/defect, assigning task & tracking defect using **Version One & JIRA**
- Extensively used **ALM /QC (Quality Center)** to write & execute Test Cases, and track Defect
- Developed automated scripts for **Regression testing, debug and enhance** the scripts, run **scripts**, wrote user-defined functions etc. using **Java, Selenium WebDriver & TestNg**
- Sound knowledge on **Core Java** and **Object-Oriented Concepts** (**Inheritance, Polymorphism**, and Exception Handling)
- Experienced in writing & executing test cases, reporting & tracking defect, preparing test report and build test automation suite using automation tools like **Selenium WebDriver**
- Experience in developing Automation framework in **Java** with **selenium WebDriver** for Web Application
- Conducted Browser Compatibility testing (Cross Browser) & Device compatibility testing (Mobile App)
- Performed unit testing using **Junit/TestNg**
- Expert in automation script development using different automation tools like **Selenium WebDriver (Eclipse, Java, TestNg/JUnit)**
- Experience in creating property files to store all the object locator (xpath/ name/ id/ css locator), file path, test site URL and use them in the Selenium Framework
- Experienced in using Version Control Tools like **GIT, SVN & GitHub**
- Experienced in designing customized framework using **Page Object Model (POM)** pattern in **Java, Selenium WebDriver, TestNg** & apache **POI**

- Experienced in Back-End testing to ensure data consistency on front-end by writing and executing **SQL** queries on the relational databases
- Experienced in testing Mobile Application in **Emulator/Simulator** and **Real Devices**
- Wrote complex **SQL query** by joining multiple tables according business logic for data validation
- Experienced in **Back-End testing** to ensure data consistency on front-end by writing and executing **SQL queries**
- Experienced in testing Web **Service** using **SOAP-UI**. Developed test suite & data driven framework using **SOAP UI Pro** for Webservices validation
- Excellent communication, problem solving skills, coordination, documentation, project planning and interpersonal skills equally capable of working efficiently under pressure, manage multiple projects and cross train sub-ordinates in other Functional areas
